INTRODUCTION

IECRE System objective

The IEC System for Certification to Standards relating to Equipment for use in Renewable Energy applications (IECRE) operates Schemes with the aim of facilitating international trade by promoting and simplifying certification and approval at the national level through mutual recognition of test and inspection results. Renewable Energy Test Laboratories (RETLs) and Renewable Energy Customer Test Facilities (RECTFs) assessment requirements are sufficient for Renewable Energy Certification Bodies (RECBs) to accept Test Reports from RETLs or RECTFs. Renewable Energy Inspection Bodies (REIBs) assessment requirements are sufficient for RECBs to accept Inspection Reports from REIBs.

The Schemes shall be governed by the IECRE Management Committee (REMC), whose responsibilities in this respect are defined in the Basic Rules of the IECRE, as given in Publication IEC CA 01 & IECRE 01-S (the combination of which is referred to as the Basic Rules throughout this document). The IECRE System objectives, details and membership information are provided in the Basic Rules and at www.iecre.org.

The approved Sectors, given in the Basic Rules and on the IECRE website, are operated under the REMC by Sector Working Groups (SWGs) defined herein.
IEC System for Certification to Standards Relating to Equipment for Use in Renewable Energy Applications (IECRE System) –

Rules of Procedure

1 Scope

The IECRE System includes assessment and certification of equipment and services covered by IEC and ISO International Standards and publications for Renewable Energy applications as are proposed by its IECRE Management Committee (REMC) and approved by the IEC Conformity Assessment Board (CAB), taking into account that several components or equipment are covered by other IEC CA systems, like IECEE.

Sectors approved to operate under the IECRE System are listed on the IECRE website (www.iecre.org) and in the Basic Rules.

2 Normative References

The following publications contain provisions which, through reference in this text, constitute provisions of these Rules of Procedure. The IECRE Management Committee (REMC) shall decide the timetable for the introduction of new publications or revised editions of existing publications. Unless otherwise identified, the most current edition shall be used.

IEC CA 01, IEC Conformity Assessment Systems – Basic Rules [Including IECRE Supplement: IECRE 01-S]
ISO/IEC Guide 2, Standardization and related activities – General vocabulary
ISO/IEC 17000, Conformity Assessment: Vocabulary and general principles
ISO/IEC 17020, General criteria for the operation of various types of bodies performing inspection
ISO/IEC 17021, Conformity assessment – Requirements for bodies providing audit and certification of management systems
ISO/IEC 17024, Conformity Assessment – General requirements for bodies operating certification of persons
ISO/IEC 17025, General requirements for the competence of testing and calibration laboratories.
ISO/IEC 17040, Conformity assessment – General requirements for peer assessment of conformity assessment bodies and accreditation
ISO/IEC 17043, Conformity assessment – General requirements for proficiency testing
ISO/IEC 17065, Conformity Assessment – Requirements for bodies certifying products, processes and services
ISO 9001, Quality management systems – Requirements

3 Definitions and Abbreviations

Please see IECRE Publication “Acronyms, Terms and Definitions”.

4 Organizational Structure

The organization structure of the IECRE is outlined in the Basic Rules. The Rules of Procedure define the following:

- Marine Energy Sector Working Group (ME-SWG);
- Solar PV Energy Sector Working Group (PV-SWG);
- Wind Energy Sector Working Group (WE-SWG);

4.1 Sector Working Groups

IECRE operates in three Sectors, Marine energy, Solar PV energy and Wind energy. All three Sector Working Groups (SWGs) report directly to the REMC and have a defined Terms of Reference as seen in Annex A.
The REMC created three SWGs to manage the special requirements of the Sectors and to prepare rules documents and proposals for REMC decision.

SWGs may propose to the REMC for approval the creations of Stakeholder Groups (SGs) to deal with specific areas in a continuous time horizon or Task Forces (TFs) for a specific period of time or for specific projects.

4.1.1 Membership

Members of an SWG(s) shall be experts nominated by the IECRE Member Bodies whom have declared desired participation in the respective Sector(s) to the Secretariat. Additionally, Chairs and Secretaries of TC82, TC88 and TC114 are members. Dues are defined in OD-001.

4.1.2 Sector Working Group Leadership

a) The Convener;
b) The immediate past Convener;
c) The Co-Convener; and
d) The IECRE Executive Secretary.

The Convener of each Sector Working Group (SWG) established by the REMC is appointed by the REMC for a period of three years, upon nomination to the REMC. They are eligible for re-appointment in the same office for one further period of three years. If at the conclusion of a second or subsequent term there are no new candidates nominated for election to the position, the SWG may by specific resolution, outlining the circumstances, propose to the REMC that the incumbent Convener be appointed to a further term of three years in that position.

The Convener shall be responsible to the REMC and shall ensure that the affairs concerning the Sector are conducted in accordance with the agreed Rules.

The principal duties of the SWG Convener are to:

a) convene meetings of the IECRE established SWG;
b) preside over the meetings;
c) decide upon the agendas for the meetings;
d) act on behalf of the SWG between its meetings; and
e) report on behalf of the SWG to the REMC.

The Convener may attend all meetings within the Sector.

In the event of the Convener’s being unable to fulfil his duties, the Co-Convener shall deputize for them.

The Co-Convener of each SWG established by the REMC is appointed for a period of three years by the REMC, on the nomination of the REMC established SWG. They are eligible for re-appointment in the same office for one further period of three years. If at the conclusion of a second or subsequent term there are no new candidates nominated for election to the position, the SWG may by specific resolution, outlining the circumstances, propose to the REMC that the incumbent Co-Convener be appointed to a further term of three years in that position.

In the absence of the SWG Convener, the SWG Co-Convener shall act in their place.

The Convener and the Co-Convener of the SWG under the IECRE System shall take office on the first day of January of the year after the meeting of the REMC at which they have been appointed unless otherwise determined by the REMC.

4.1.3 Meetings

Meetings of the SWG shall be held as necessary.
In preparing the agenda, the SWG Convener shall, as far as possible, list all the documents related to the various items for discussion. SG and TF Conveners may attend the SWG meetings at the invitation of the Convener, as observers. Additional observers, nominated by a Member Body or invited by the Convener, may attend the SWG meetings based on host space, etc. The observers right to speak shall be determined by the SWG Convener.

SWGs may consider allowing SGs to be given a voice in general discussions and to be allowed to comment as a SG.

Draft minutes of the meetings of the SWG shall be circulated to all Members of the SWG within one month of the meeting.

The SWG provides a report on its activities at least annually to the REMC and submits proposals for approval by the REMC with regard to:

a) Modifications to the SWG Rules of Procedure;
b) The appointment of SWG Convener and Co-Convener;
c) The annual financial forecast and business plan for the SWG;
d) Proposals for extensions to the scope of the Sector Schemes; and
e) Proposals for the use of normative documents other than IEC or ISO International Standards.

4.1.4 Voting

SWG have no voting authority. SWGs shall make recommendations for REMC approval.

Comments received on any DV or DFA shall be responded to by the relevant SG or TF.

All other voting requirements are as per the Basic Rules.

4.2 Numbering Definition

To ensure transparency and enhance harmonization in the Sectors, the following structure regarding a numbering system shall be used for all REMC and SWG SGs, as shown in Table 1.

**TABLE 1: Working Group and Stakeholder Group Numbering Convention**

5 Requirements for Participation in the IECRE System

5.1 Participation

IECRE Certification Bodies (RECBs), IECRE Testing Laboratories (RETLs), IECRE Customer Test Facilities (RECTFs) and IECRE Inspection Bodies (REIBs) approved by the REMC in accordance with the Basic Rules may participate in the IECRE Scheme(s).

Applications from organizations seeking acceptance as RECB, RETL, RECTF or REIB for the purpose of issuing IECRE deliverables shall be endorsed by the Member Body in the IECRE participating country. Reference is made to the Basic Rules regarding country membership of the IECRE System.

It is the duty of all parties operating in the IECRE Scheme(s), including manufacturers and other organizations seeking IECRE deliverables, to conduct affairs in a professional and ethical manner that does not result in actions, misleading information or claims that may bring the IEC and/or the IECRE credibility into question.

RECBs, RETLs, RECTFs and REIBs are permitted to be independent legal entities and can participate independently in the IECRE System.

For IECRE Customer Test Facilities (RECTFs) see Clause 8.4.

6 Deliverables of the IECRE System

6.1 IECRE Test Reports (RETRs)

6.1.1 Overview

An RETR is prepared and issued by an RETL or RECTF. An RETR is not considered a statement of conformity, but may form input to the certification process. If the RETR is to be used to produce a Conformity Statement by an RECB, the RECB shall review the RETR for conformity with the relevant Standard(s) and IECRE requirements.

6.1.2 Description of Equipment

The RETR shall contain a clear description of the RE equipment or change to already certified equipment, the name and address of the applicant and the manufacturer and the edition of the Standard, amendments, if any, and relevant national differences. The RETR shall give, as far as necessary, for each clause of the identified Standard a brief reference to the requirements and the results of tests and examinations as per the Standard. The RETR shall also contain the information necessary for identification of the RE equipment such as: type designation, ratings, description, photographs, etc.

6.1.3 Layout

The REMC may delegate the SWGs to develop and maintain standardized Test Report Forms for all Standards used in the IECRE System, for subsequent approval by the REMC. The front cover sheet of all Test Report Forms shall be common for all Sectors.

6.1.4 Issuing

RETRs are intended to be issued in support of IECRE Certificates or Conformity Statements. The RETR may include the reporting of the RE equipment testing results with declared local and/or national differences. The RETR may be used by an RECB when issuing their own local and/or national Certificate or Conformity Statement. An RETR may be issued to cover selected clauses and test results of a Standard. It is the responsibility of the RECB to ensure that they are in possession of sufficient RETRs to cover the full assessment to (a) Standard(s).

6.1.5 Restrictions

RETRs shall not be used in any form of advertising or sales promotion to ensure that the information is not misrepresented.

6.1.6 Copies

When a copy of an RETR is required, it shall be reproduced in its entirety.

6.1.7 Ensuring Conformity

The manufacturer has the ongoing responsibility to ensure that all RE equipment, for which an RETR is issued, is in accordance with the design of the certified equipment. Failure to do so, and any other misuse of the RETR, could lead to suspension or cancellation of the associated IECRE Certificate or Conformity Statement by the RECB.
6.2 Product Certificates

6.2.1 Overview
Product Certificates include Component, Prototype, Type and Project Certificates. Sector specific requirements for Product Certificates shall be developed by the SWGs, if necessary, for REMC approval. A Product Certificate is a document issued by an RECB to attest that specific Renewable Energy equipment was fully evaluated according to the applicable Scheme including the relevant requirements of one or more applicable Standard(s) accepted for use in the IECRE System.

6.2.2 Layout
The REMC may delegate the SWGs to develop and maintain standardized Product Certificate templates for all Schemes used in the IECRE System for subsequent approval by the REMC. The front cover sheet of all Product Certificates shall be common for all Sectors.

6.2.3 Usage of IECRE Logo Limitations
The IECRE logo shall be used on Product Certificates. Additional limitations are provided in Clause 7.1.

6.2.4 Suspension/Withdrawal
Product Certificates shall be suspended or withdrawn by the issuing RECB if:
- The Product Certificate is misused;
- The Product Certificate has been issued in error;
- The RE equipment no longer corresponds to the originally tested equipment;
- Incidents revealing serious defects in the RE equipment; or
- The holder of the Product Certificate requests suspension or withdrawal.

When a Product Certificate has been suspended or withdrawn, the IECRE Executive Secretary shall be notified as soon as possible by the issuing RECB, which shall state the reason for suspension or withdrawal. The RECB shall inform the manufacturer of the suspension or withdrawal. The IECRE Executive Secretary shall notify all RECBs participating in the IECRE System that the relevant Product Certificate has been suspended or withdrawn and give the reason for the action taken.

The maximum suspension time is one year. If a Product Certificate is suspended, it can be reinstated if the reason for suspension is rectified and the RE equipment is reaffirmed by the RECB. If the RE equipment can't be reaffirmed within one year, the Product Certificate shall be withdrawn.

6.2.5 Procedures for Handling Product Certificates

6.2.5.1 General
An application for obtaining a Product Certificate may be made by an applicant to any RECB accepted for the relevant Scheme. The applicant will be the holder of the Product Certificate.

6.2.5.2 Procedure for Obtaining a Product Certificate
The application shall be made and dealt with according to the rules of the RECB to which it is submitted. That RECB shall inform the applicant about the relevant rules and procedures for the selected Scheme and about the information needed for Product Certification.

If a Product Certificate is to be issued, the RECB shall enter the necessary data into the IECRE database. The Product Certificate is considered issued once this data has been entered and submitted. The applicant may also request testing to cover national differences in countries in which the Product Certificate is to be used.

6.2.5.3 Procedure for Recognition of Product Certificates
When an applicant applies to another RECB to recognize an existing IECRE Product Certificate for national certification or approval of RE equipment on the basis of a Product Certificate, the application shall be accompanied by a copy of the Product Certificate together with the relevant certification documents (RETRs, Conformity Statements, Certificates from other IEC CA Systems, etc.) and, if relevant, with attached reports covering national differences and, if required by the RECB, make an RE equipment sample available.

The RECB shall evaluate the submitted IECRE Product Certificate regardless of the location of the issuing RECB. If the result of this evaluation is favourable, national certification or approval shall be granted by the RECB without additional evaluation and testing. However, if the IECRE Product
Certificate does not cover declared national differences, if any, arrangements shall be made with the applicant to carry out the additional evaluation and testing. The RECB retains the right to further evaluate the RE equipment to ascertain whether or not the RE equipment complies with the relevant Standard(s). Such additional evaluation should be kept to a minimum.

Should the RECB receiving an IECRE Product Certificate have any questions and/or issues which may prevent the recognition by the receiving RECB, the RECB that issued the IECRE Product Certificate shall be contacted as soon as possible to resolve the questions and/or issues. If the RECBs involved arrive at different conclusions, the case shall be referred to the IECRE Executive Secretary.

The RECBs shall have the right to keep for reference photographs, technical documentation and RE equipment samples or, for large RE equipment, parts of such RE equipment, when required according to their rules. Such reference material shall be confidential.

6.2.6 Specific Requirements for Component Certificates
To be developed at a later date.

6.2.7 Specific Requirements for Prototype Certificates
To be developed at a later date.

6.2.8 Specific Requirements for Type Certificates
To be developed at a later date.

6.2.9 Specific Requirements for Project Certificates
To be developed at a later date.

6.3 Conformity Statements
To be developed at a later date.

6.4 Inspection Reports
To be developed at a later date.

7 Description of IECRE Operational Procedures

7.1 General
The IEC, IECRE and combination IEC/IECRE logos are copyrighted and belong to the IEC. Their use is restricted to official documents published by the IEC or the IECRE or both and shall not be reproduced or utilized in any form or by any means, electronic or mechanical, including photocopying and microfilm, without prior permission in writing from the IECRE Executive Secretary. See OD-006 for additional details on the usage of IEC/IECRE logos.

7.2 Documents

7.2.1 Operational Documents (ODs) and Administrative Documents (ADs)
See IECRE website for all REMC and Sector ODs and ADs.

7.2.2 Clarification Sheets
See IECRE website for all REMC and Sector Clarification Sheets.

7.2.3 Development and Maintenance of Operational Documents
In order to approve new documents or change any approved documents under IECRE, the following process must be adhered to:

a) REMC defines scope of revision/development as an REMC decision. This may be done based on a submitted proposal for such a scope.
b) REMC WG 001 or another assigned working group or task force prepares a proposal for new or updated documents as per agreed scope, to be submitted for review and comment to REMC as well as WG001 with a review period of six weeks.
c) After inclusion of the comments (or a written argumentation as to why comments have not been taken on board), a revised document to be submitted for review and voting by REMC, with a minimum review and balloting period of six weeks. The document must refer back to the relevant REMC decision regarding the approved scope for the document or the approved changes to the document.
d) Once the proposed updated document has been approved by the REMC, it replaces the previous version as per agreed introduction date. In case of a new document, once approved
8 Peer Assessment Program

8.1 Acceptance of Renewable Energy Test Laboratories (RETLs)

An RETL shall be a third-party laboratory. The RETL assessment shall be made for each specific competence area. This also means that competency for one specific type of test does not imply competency for another specific type of test. The SWGs shall define which specific competency areas are relevant for each SWG, for REMC approval. Such a competence area shall be defined by reference to (or part of) a Standard within the scope of the IECRE and that contains requirements on how a specific test shall be executed.

The assessment of candidate RETLs shall be based on the following five elements:

1) A review of a random sample of historic reports issues for the competence area (to assess compliance with the referenced Standard).

2) The results of a proficiency test for the competence area. The Proficiency Test Program (PTP) shall be provided by an organization following the basic principles of ISO/IEC 17043 although the SWGs may deviate from the requirements in this Standard as long as these deviations are described in an approved Operational Document. For some tests it is too expensive/difficult to test multiple samples, in which case the proficiency test may cover a more limited part of the Standard as long as this is defined in an approved OD.

3) A review of the candidate RETL’s own processes and procedures related to the specific competence area.

4) An inspection of an ongoing test (or the installation of a new test) and the related documentation.

5) An assessment of the candidate RETL against ISO/IEC 17025 in case the test laboratory does not already hold an accreditation for ISO/IEC 17025 for the specific competence area.

The SWG shall propose specific requirements for the assessment to focus on in the form of an Operational Document, for REMC approval. The assessment shall follow the principle of peer assessment as described in ISO/IEC 17040 and per IEC/CAB Conformity Assessment Policy (IEC CAB-P01).

For some tests (such as a wind tunnel or wave tank or similar) the specific equipment needs to be assessed. Therefore, a test laboratory that operates such test facilities in various locations shall have each of these facilities assessed.

For some tests (such as performance testing of marine energy conversion systems or loads testing on wind turbines) the test equipment is temporarily installed in a specific location in the field, normally defined by the object to be tested (the marine energy conversion system, the wind turbine or the solar energy plant). Such tests are often monitored from various offices around the world. In this case the candidate RETL may assign one specific office that shall be assessed. Other offices from the same organisation do not need to be assessed as long as they fall under the same quality management system as the office that is being assessed and as long as this office takes responsibility for the quality of the work done in the other offices.

8.1.1 Application as Renewable Energy Test Laboratory (RETL)

The candidate RETL shall, via their national Member Body of the IECRE System, make an application for the acceptance as RETL for one or more competence areas as defined by one of the SWGs, and approved by the REMC, in the IECRE System.

The application shall be submitted to the IECRE Executive Secretary and shall be accompanied by a declaration as detailed in the relevant ODs.

In submitting an application, the candidate RETL agrees to comply with the IECRE System Rules including the relevant ODs and Clarification Sheets.

8.1.2 Initial Assessment

The candidate RETL shall be assessed to determine that the conditions according to the IECRE System, including the rules and ODs for the specific Certification Scheme(s), are fulfilled. Peer assessors, including a lead assessor, selected from the REMC approved pool of assessors are appointed by the IECRE Executive Secretary and shall carry out the assessment. The team shall also include technical assessors with competency to cover the scope of the RETL’s assessment.

The requirements for the assessment may be further detailed in Sector specific rules and ODs covering one or several different Certification Schemes.
The candidate RETL shall be given the names and assessment roles of the team of assessors proposed to be appointed by the IECRE Executive Secretary. Candidate RETLs may object “for cause” (reasons to be stated) to the appointment of an assessor(s) to the IECRE Executive Secretary. If the stated reasons are considered sufficient, a new assessor(s) will be appointed.

The candidate RETL to be assessed shall accept to pay the professional fees of the team of assessors, as outlined in OD-003, and the reasonable travelling and living expenses arising from the assessment. An estimate of these expenses shall be provided by each assessor and agreed with the candidate RETL in advance. The IECRE Executive Secretary shall manage the assessment process.

8.1.3 New Entrant Assessment
For consideration to be developed at a later date.

8.1.4 Resolution of Differences
During the assessment, the assessment team shall prepare a draft assessment report that shall be discussed with the management of the applicant RETL. Efforts should be made to resolve any differences of opinion between the assessors and the applicant during the closing meeting.

Non-conformities shall be reported at the conclusion of the closing meeting and a time frame for resolving them shall be agreed. After this time frame, the final full assessment report shall be prepared.

8.1.5 Notification
If the decision of the REMC is positive, the IECRE Executive Secretary shall inform the RETL of approval.

If the decision of the REMC is negative, the provisional approval shall be withdrawn. The IECRE Executive Secretary shall inform the RETL and may, depending on the findings, suggest to the RETL:

- to withdraw the application, or
- to accept a new assessment

Based on a negative decision by the REMC, the RETL shall withdraw all System deliverables issued during the provisional approval period.

8.1.6 Changes
The RETL shall inform the IECRE Executive Secretary about significant changes (organizational changes, changes to the quality management system, change in location, etc.) in the formal information given in the application, and possibly supplemented in the full assessment report, within 4 weeks after these changes happen.

The IECRE Executive Secretary, in consultation with select members of the peer assessment pool, shall review these changes and determine if a re-assessment is needed.

8.1.7 Extension of Scope
When an RETL wishes to extend its scope in the IECRE System, an application shall be made to the IECRE Executive Secretary. The assessment of the extended scope shall follow the same procedure as the initial assessment.

8.1.8 Re-Assessment
The acceptance of the RETL is valid for a period of maximum five years and the Sector specific OD may give further details with respect to the validity period (but cannot exceed the five years). The re-assessment shall follow the same procedure as the initial assessment except that non-conformities shall be resolved within 3 months. The IECRE Executive Secretary shall notify RETLs early in the year as to when their re-assessment is required for that year. The RETL shall then apply for re-assessment within one month of the notification. In case of unsuccessful re-assessment or refusal, the RETL shall be suspended.

8.1.9 Withdrawal Requested by RETL
An RETL wishing to withdraw from the IECRE System shall notify the IECRE Executive Secretary via the national Member Body of the IECRE System at least one year in advance and shall indicate the reason for withdrawal and the date from which the withdrawal becomes effective.

8.1.10 Suspension and Withdrawal
A RETL may be suspended for non-payment of fees or for violation of any rules or violation of the spirit and intent of the IECRE System’s objectives and goals related to the facilitation of international trade and reciprocity of such. Any proposal to suspend an RETL, or to cancel such suspension, shall require
agreement by a majority of at least two-thirds of the total number of eligible votes received from the IECRE System Member Bodies, with abstentions and non-votes not being counted, except in the case of suspension for non-payment of fees as decided by the REMC, in which case the IECRE Executive Secretary may take the administrative action of suspension.

If the suspension of the RETL has not been cancelled during the year after which the decision was taken, the RETL concerned ceases to participate in the IECRE System (i.e. issue IECRE deliverables) and is fully withdrawn.

Suspended RETLs shall not be permitted to participate in the IECRE System during the period of suspension and shall have no right to issue IECRE System deliverables or receive documents and publications of the IECRE System.

RETLs whose suspension has been cancelled and have been reinstated shall submit a new application, including any application fees, as well as outstanding fees, and shall undergo a full initial assessment. However, an RETL suspended only for the failure to pay fees can be reinstated upon fee payment without a new application. An RETL who is withdrawn is required to re-apply as a new RETL applicant.

8.2 Acceptance of Renewable Energy Certification Bodies (RECBs)

The assessment of candidate RECBs shall be based on the following two elements:

- The competence of the RECB shall be demonstrated by peer assessment in line with ISO/IEC 17040 and detailed in the Sector specific ODs covering the specific Certification Scheme; and
- Accreditation requirements to ISO/IEC 17065 shall be defined in the Sector level Rules of Procedure.

8.2.1 Application as Renewable Energy Certification Body (RECB)

The candidate RECB, via their national Member Body of the IECRE System, shall make an application for the acceptance as RECB for one or more Certification Schemes which are accepted for use in the IECRE Conformity Assessment System.

The application shall be submitted to the IECRE Executive Secretary and shall be accompanied by a declaration as detailed in the relevant ODs.

In submitting an application, the candidate RECB agrees to comply with the IECRE System Rules including the ODs covering the specific Certification Scheme(s) and Clarifications Sheets.

8.2.2 Initial Assessment

The candidate RECB shall be assessed to determine that the conditions according to the IECRE System, including the rules and ODs for the specific Certification Scheme(s), are fulfilled. Peer assessors, including a lead assessor, selected from the REMC approved pool of assessors are appointed by the IECRE Executive Secretary and shall carry out the assessment. The team shall also include technical assessors with competency to cover the scope of the RECB’s assessment.

The requirements for the assessment may be further detailed in Sector specific rules and ODs covering one or several different Certification Schemes.

The candidate RECB shall be given the names and assessment roles of the team of assessors proposed to be appointed by the IECRE Executive Secretary. Candidate RECBs may object “for cause” (reasons to be stated) to the appointment of an assessor(s) to the IECRE Executive Secretary. If the stated reasons are considered sufficient, a new assessor(s) will be appointed.

The candidate RECB to be assessed shall accept to pay the professional fees of the team of assessors, as outlined in OD-003, and the reasonable travelling and living expenses arising from the assessment. An estimate of these expenses shall be provided by each assessor and agreed with the candidate RECB in advance. The IECRE Executive Secretary shall manage the assessment process.

8.2.3 New Entrant Assessment

For consideration to be developed at a later date.

8.2.4 Resolution of Differences

During the assessment, the assessment team shall prepare a draft assessment report that shall be discussed with the management of the applicant RECB. Efforts should be made to resolve any differences of opinion between the assessors and the applicant during the closing meeting.

Non-conformities shall be reported at the conclusion of the closing meeting and a time frame for resolving them shall be agreed. After this time frame, the final assessment report shall be prepared.
8.2.5 Notification
If the decision of the REMC is positive, the IECRE Executive Secretary shall inform the RECB of approval.
If the decision of the REMC is negative, the provisional approval shall be withdrawn. The IECRE Executive Secretary shall inform the RECB and may, depending on the findings, suggest to the RECB:
- to withdraw the application, or
- to accept a new assessment
Based on a negative decision by the REMC, the RECB shall withdraw all System deliverables issued during the provisional approval period.

8.2.6 Changes
The RECB shall inform the IECRE Executive Secretary about significant changes (organizational changes, changes to the quality management system, change in location, etc.) in the formal information given in the application, and possibly supplemented in the full assessment report, within 4 weeks after these changes happen.

The IECRE Executive Secretary, in consultation with select members of the peer assessment pool, shall review these changes and determine if a re-assessment is needed.

8.2.7 Extension of Scope
When an RECB wishes to extend its scope in the IECRE System, an application shall be made to the IECRE Executive Secretary. The assessment of the extended scope shall follow the same procedure as the initial assessment.

8.2.8 Re-Assessment
The acceptance of the RECB is valid for a period of maximum five years and the Sector specific OD may give further details with respect to the validity period (but cannot exceed the five years). The re-assessment shall follow the same procedure as the initial assessment except that non-conformities shall be resolved within 3 months. The IECRE Executive Secretary shall notify RECBs early in the year as to when their re-assessment is required for that year. The RECB shall then apply for re-assessment within one month of the notification. In case of unsuccessful re-assessment or refusal, the RECB shall be suspended.

8.2.9 Withdrawal Requested by RECB
An RECB wishing to withdraw from the IECRE Conformity Assessment System shall notify the IECRE Executive Secretary via the national Member Body of the IECRE System at least one year in advance and shall indicate the reason for withdrawal and the date from which the withdrawal becomes effective.

8.2.10 Suspension and Withdrawal
A RECB may be suspended for non-payment of fees or for violation of any rules or violation of the spirit and intent of the IECRE System’s objectives and goals related to the facilitation of international trade and reciprocity of such. Any proposal to suspend an RECB, or to cancel such suspension, shall require agreement by a majority of at least two-thirds of the total number of eligible votes received from the IECRE System Member Bodies, with abstentions and non-votes not being counted, except in the case of suspension for non-payment of fees as decided by the REMC, in which case the IECRE Executive Secretary may take the administrative action of suspension.

If the suspension of the RECB has not been cancelled during the year after which the decision was taken, the RECB concerned ceases to participate in the IECRE System (i.e. issue IECRE deliverables) and is fully withdrawn.

Suspended RECBs shall not be permitted to participate in the IECRE System during the period of suspension and shall have no right to issue IECRE System deliverables or receive documents and publications of the IECRE System.

RECBs whose suspension has been cancelled and have been reinstated shall submit a new application, including any application fees, as well as outstanding fees, and shall undergo a full initial assessment. However, an RECB suspended only for the failure to pay fees can be reinstated upon fee payment without a new application. RECB who is withdrawn is required to re-apply as a new RECB applicant.

8.3 Acceptance of Renewable Energy Inspection Bodies (REIBs)
The assessment of candidate REIBs shall be based on the following two elements:
The competence of the REIB shall be demonstrated by peer assessment in line with ISO/IEC 17040 and detailed in the Sector specific ODs covering the specific Certification Scheme; and

Accreditation requirements to ISO/IEC 17020 shall be defined in the Sector level Rules of Procedure.

8.3.1 Application as Renewable Energy Inspection Body (REIB)

The candidate REIB, via their national Member Body of the IECRE System, shall make an application for the acceptance as REIB for one or more Certification Schemes which are accepted for use in the IECRE Conformity Assessment System.

The application shall be submitted to the IECRE Executive Secretary and shall be accompanied by a declaration as detailed in the relevant ODs.

In submitting an application, the candidate REIB agrees to comply with the IECRE System Rules including the ODs covering the specific Certification Scheme(s) and Clarifications Sheets.

8.3.2 Initial Assessment

The candidate REIB shall be assessed to determine that the conditions according to the IECRE System, including the rules and ODs for the specific Certification Scheme(s), are fulfilled. Peer assessors, including a lead assessor, selected from the REMC approved pool of assessors are appointed by the IECRE Executive Secretary and shall carry out the assessment. The team shall also include technical assessors with competency to cover the scope of the REIB’s assessment.

The requirements for the assessment may be further detailed in Sector specific rules and ODs covering one or several different Certification Schemes.

The candidate REIB shall be given the names and assessment roles of the team of assessors proposed to be appointed by the IECRE Executive Secretary. Candidate REIBs may object "for cause" (reasons to be stated) to the appointment of an assessor(s) to the IECRE Executive Secretary. If the stated reasons are considered sufficient, a new assessor(s) will be appointed.

The candidate REIB to be assessed shall accept to pay the professional fees of the team of assessors, as outlined in OD-003, and the reasonable travelling and living expenses arising from the assessment. An estimate of these expenses shall be provided by each assessor and agreed with the candidate REIB in advance. The IECRE Executive Secretary shall manage the assessment process.

8.3.3 New Entrant Assessment

For consideration to be developed at a later date.

8.3.4 Resolution of Differences

During the assessment, the assessment team shall prepare a draft assessment report that shall be discussed with the management of the applicant REIB. Efforts should be made to resolve any differences of opinion between the assessors and the applicant during the closing meeting.

Non-conformities shall be reported at the conclusion of the closing meeting and a time frame for resolving them shall be agreed. After this time frame, the final assessment report shall be prepared.

8.3.5 Notification

If the decision of the REMC is positive, the IECRE Executive Secretary shall inform the REIB of approval.

If the decision of the REMC is negative, the provisional approval shall be withdrawn. The IECRE Executive Secretary shall inform the REIB and may, depending on the findings, suggest to the REIB:

- to withdraw the application, or
- to accept a new assessment

Based on a negative decision by the REMC, the REIB shall withdraw all System deliverables issued during the provisional approval period.

8.3.6 Changes

The REIB shall inform the IECRE Executive Secretary about significant changes (organizational changes, changes to the quality management system, change in location, etc.) in the formal information given in the application, and possibly supplemented in the full assessment report, within 4 weeks after these changes happen.

The IECRE Executive Secretary, in consultation with select members of the peer assessment pool, shall review these changes and determine if a re-assessment is needed.
8.3.7 Extension of Scope

When an REI B wishes to extend its scope in the IECRE System, an application shall be made to the IECRE Executive Secretary. The assessment of the extended scope shall follow the same procedure as the initial assessment.

8.3.8 Re-Assessment

The acceptance of the REI B is valid for a period of maximum five years and the Sector specific OD may give further details with respect to the validity period (but cannot exceed the five years). The re-assessment shall follow the same procedure as the initial assessment except that non-conformities shall be resolved within 3 months. The IECRE Executive Secretary shall notify REI Bs early in the year as to when their re-assessment is required for that year. The REI B shall then apply for re-assessment within one month of the notification. In case of unsuccessful re-assessment or refusal, the REI B shall be suspended.

8.3.9 Withdrawal Requested by REIB

An REI B wishing to withdraw from the IECRE Conformity Assessment System shall notify the IECRE Executive Secretary via the national Member Body of the IECRE System at least one year in advance and shall indicate the reason for withdrawal and the date from which the withdrawal becomes effective.

8.3.10 Suspension and Withdrawal

A REI B may be suspended for non-payment of fees or for violation of any rules or violation of the spirit and intent of the IECRE System’s objectives and goals related to the facilitation of international trade and reciprocity of such. Any proposal to suspend an REI B, or to cancel such suspension, shall require agreement by a majority of at least two-thirds of the total number of eligible votes received from the IECRE System Member Bodies, with abstentions and non-votes not being counted, except in the case of suspension for non-payment of fees as decided by the REMC, in which case the IECRE Executive Secretary may take the administrative action of suspension.

If the suspension of the REI B has not been cancelled during the year after which the decision was taken, the REI B concerned ceases to participate in the IECRE System (i.e. issue IECRE deliverables) and is fully withdrawn.

Suspended REIBs shall not be permitted to participate in the IECRE System during the period of suspension and shall have no right to issue IECRE System deliverables or receive documents and publications of the IECRE System.

REIBs whose suspension has been cancelled and have been reinstated shall submit a new application, including any application fees, as well as outstanding fees, and shall undergo a full initial assessment. However, an REI B suspended only for the failure to pay fees can be reinstated upon fee payment without a new application. REIB who is withdrawn is required to re-apply as a new REIB applicant.

8.4 Acceptance of Renewable Energy Customer Test Facilities (RECTFs)

The scope of this clause is to define requirements for RE Customer Test Facility (RECTF) for performing tests within competence areas defined by the IECRE scheme.

The requirements shall ensure that the independency and validity of tests performed by laboratories complying with these requirements can be trusted and the resulting test reports can be used with confidence for design and certification work.

8.4.1 Acceptance of Customer Test Facilities

An RECTF is a facility covering 1st and 2nd party testing. See Table 2 below for definitions according to ISO/IEC 17000.

<table>
<thead>
<tr>
<th>Party</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>1st Party</td>
<td>The OEM (Original Equipment Manufacturer) makes the “object”. Includes also the OCM (Original Component Manufacturer).</td>
</tr>
<tr>
<td>2nd Party</td>
<td>End user or their agent – the one that uses the “object”.</td>
</tr>
<tr>
<td>3rd Party</td>
<td>Independent of OEM, OCM and End-User.</td>
</tr>
</tbody>
</table>

The RECTF assessment shall be made specific for each competence area. This also means that proficiency for one specific type of test (competence area) does not imply proficiency for another specific type of test (competence area). The SWGs shall define which competency areas are relevant for the specific SWGs. Such a competence area shall be defined by reference to (or part of) an ISO/IEC Standard that contains requirements on how a specific test shall be executed. In the absence of ISO/IEC Standards containing specific test requirements a non-standardized / proprietary method may be followed if included under the scope of RECTF assessment.
Being assessed as an RECTF allows greater flexibility and control for OEMs of their evaluation and testing programs required under the IECRE Conformity Assessment Scheme. As tests performed by RECTFs are executed for various purposes, several RECTF stages are identified:

- **Stage 1** – Also known as Testing at Manufacturers Premises/Off-Site Testing, where the full testing scope is carried out by an approved RETL staff or RECB staff at the RECTF facility. The main focus is in the assessment is at the RECTF facility.
- **Stage 2** – Also known as Witness Testing, where the test is performed by RECTF staff and reviewed by an approved RETL or RECB. The RETL or RECB is also responsible for the test data evaluation and the test report. The main focus in the assessment is at the RECTF facility and the testing.
- **Stage 3** – Also known as Test Data Acceptance, where RECTF staff and facility are assessed and qualified to produce their own test data. The evaluation is done by the RECTF and reviewed by an approved RETL or RECB. The RETL or RECB is also responsible for the test report. The main focus in the assessment is at the RECTF facility, test execution and data evaluation.
- **Stage 4** – Also known as Test Data and Evaluation Acceptance, where RECTF staff and facility are assessed and qualified to produce their own test data, evaluation, and test reports where only selected parts of the test programs are reviewed by an approved RETL or RECB. The assessment should cover the entire test program/process.

Table 3 below depicts the various RECTF Stages and the varying responsibilities of the RECTF, RETL, and RECB.

### Table 3: RECTF Stages and Responsibilities

<table>

</tbody>
</table>

The requirements shall ensure that the independency and validity of test performed by facilities complies with these requirements can be trusted and used with confidence for design and certification work at the same level as 3rd party IECRE approved test labs (RETL) and certification bodies (RECB). Under no circumstances does the acceptance of an RECTF apply to agent laboratories or subcontractors. Only the OEM staff and facilities originally assessed under the peer assessment and initial qualification of the RECTF are approved to perform testing and/or evaluation under this program.

The assessment of candidate RECTFs is based on the desired Stage of the RECTF per Table 3 above. All stages require an assessment as described in this chapter. The SWG shall decide on specific requirements for the assessment to focus in the form of Sector specific OD(s) to identify specific assessment requirements for initial and re-assessment of RECTFs under each RE sector.

The assessment shall be carried out by an RECB, RETL or independent expert at the request of the SWG in accordance with the relevant requirements defined in the Sector OD(s).

For some tests (such as a wind tunnel or wave tank or similar) the specific equipment needs to be assessed. Therefore, a test laboratory that operates such test facilities in various locations will have to have each of these facilities assessed.

### 8.4.2 Conditions of Acceptance

A customer facility shall be accepted as an RECTF by the REMC. Reports resulting from testing and/or evaluation performed at the approved RECTF can be issued (and use the IECRE logo) after acceptance by the REMC within 6 months. The reporting author is determined based on the approved Stage of the RECTF per Table 2 above. The elements of the assessment may indicate (minor) problems in a specific area (such as a report that is not 100% compliant to the Standard). This is not an automatic failure of the assessment as the final recommendation shall be made by the assessment team to the REMC and can consider a specific improvement plan.
8.4.3 Application as Renewable Energy Customer Test Facility (RECTF)

The candidate RECTF shall, via their national Member Body of the IECRE System, make an application for the acceptance as RECTF for one or more competence areas as defined by one of the SWGs in the IECRE System.

The application shall be submitted to the IECRE Executive Secretary and shall be accompanied by a declaration as detailed in the relevant ODs. It shall also describe the stage as defined in 8.4.1 to be applied for.

In submitting the application form, the candidate RECTF agrees to comply with the IECRE System Rules including the relevant ODs and Clarification Sheets.

8.4.4 Initial Assessment

The candidate RECTF shall be assessed to determine that the conditions according to the IECRE System, including the rules and ODs for the specific Certification Scheme(s), are fulfilled.

Assessors appointed by the IECRE Executive Secretary shall carry out the assessment. The assessment team is appointed by the IECRE Executive Secretary and includes a lead assessor. The team shall also include technical assessors with competency to cover the scope of the RECTF assessment. The requirements for the assessment may be further detailed in Sector specific rules and ODs covering one or several different Certification Schemes.

The candidate RECTF shall be given the names and current appointments of the team of assessors proposed to be appointed by the IECRE Executive Secretary. Candidate RECTF may object "for cause" (reasons to be stated) to the appointment of an assessor(s) to the IECRE Executive Secretary. If the stated reasons are considered sufficient, a new assessor(s) will be appointed.

The candidate RECTF to be assessed shall accept to pay the professional fees of the team of assessors, as outlined in OD-003, and the reasonable travelling and living expenses arising from the assessment. An estimate of these expenses shall be provided by each assessor and agreed with the candidate RECTF in advance. The IECRE Executive Secretary shall manage the assessment process, including the appointment of the team of assessors from a pool of assessors approved by the REMC.

The assessment of candidate RECTFs is based on the desired stages and responsibilities in the stages as described in Table 2 (chapter 8.4.2). The assessment is focusing on the areas of responsibility taken by the candidate RECTF and the interface towards the partnered RETL/RECB. An RECTF may partner with one or more RETLs/RECBs for the competence areas defined. Any cooperation needs to be based on a binding contract. Change of partner requires an updated assessment (document check by lead assessor). The SWG shall propose to the REMC specific requirements for the assessment in the form of Sector specific ODs for initial and re-assessment of RECTFs under each RE sector.

The scope of the assessment shall be defined and agreed between the candidate, IECRE Secretary and assigned team of assessors.

The assessment shall ensure that the independency and validity of test performed by facilities complying with these requirements can be trusted and used with confidence for design and certification work at the same level as 3rd party IEC approved test labs (RETL) and certification bodies (RECB). Under no circumstances does the acceptance of an RECTF apply to agent laboratories or subcontractors.

Only initial qualification of the RECTF and partner RETL/RECB das original assessed under the assessment are approved to perform testing and/or evaluation under this program.

To ensure that the RECTF staff always fulfills the qualification, the RECTFs must have a procedure in place for staff qualification which is following ISO/IEC 17205:2017, section 6.2.

The assessment shall be carried out by the assessment team in accordance with the relevant requirements defined in the Sector ODs. The assessment team shall be composed from a competence specific pool of RETLs, RECBs or Independent Experts which haven proven their competences in the specific area. Other approved RECTFs are excluded from the assessment pool.

Based on the agreed scope the candidate shall submit the following information as relevant:

1. An overview of all reports the candidate has issued in the last 3 years where compliance is claimed for the relevant standard(s) for the competence area
2. The Test Procedures related to the competence being assessed
3. Three reports from the list provided by the candidate RECTF being assessed as selected by the team of assessors
4. Test Procedures as selected by the team of assessors (this could cover all procedures in the overview)
5. The most recent proficiency test result or other applicable methods if available.
6. Results of the test or analysis of the specimen or dataset as provided by the team of assessors

7. Information about partnered RETL/RECB (Name, Address, Date of contract, contact person)

8. Interface description towards partnered RETL/RECB. Handling of data and documents between partners.

The most basic assessment is done when the applicant does not have a sufficient number of reports available for review. This assessment is based on the assessor being involved in the preparation and execution of the first, second or third test and possibly if required subsequent tests. The scope of the assessment shall be made in agreement with the assessor and based on the guidance in the ODs.

For the assessment a detailed plan shall be made to describe the scope and timing of the full assessment including the expected deliverables from the candidate.

8.4.5 New Entrant Assessment

For consideration to be developed at a later date.

8.4.6 Resolution of Differences

During the assessment, the assessment team shall prepare a draft assessment report based on OD-005 that shall be discussed with the management of the applicant RECTF. Efforts should be made to resolve any differences of opinion between the assessors and the applicant during the closing meeting.

Non-conformities shall be reported at the conclusion of the closing meeting and a time frame for resolving them shall be agreed. After this time frame, the final assessment report shall be prepared.

8.4.7 Notification

If the decision of the REMC is positive, the IECRE Executive Secretary shall inform the RECTF of approval.

If the decision of the REMC is negative, the provisional approval shall be withdrawn. The IECRE Executive Secretary shall inform the RECTF and may, depending on the findings, suggest to the RECTF:

- to withdraw the application, or
- to accept a new assessment

Based on a negative decision by the REMC, the RECTF shall withdraw all System deliverables issued during the provisional approval period.

8.4.8 Changes

The RECTF shall inform the IECRE Executive Secretary about significant changes (organizational changes, changes to the quality management system, change in location, etc.) in the formal information given in the application, and possibly supplemented in the full assessment report, within 4 weeks after these changes happen.

The IECRE Executive Secretary, in consultation with select members of the assessment pool, shall review these changes and determine if a re-assessment is needed.

8.4.9 Extension of Scope

When an RECTF wishes to extend its scope in the IECRE System, an application shall be made to the IECRE Executive Secretary. The assessment of the extended scope shall follow the same procedure as the initial assessment.

8.4.10 Re-Assessment

The validity of the acceptance of the RECTF depends on the Stage as shown in Table 3, but is for a maximum three years. The Sector specific OD may give further details with respect to the validity period (but cannot exceed the three years). The re-assessment shall follow the same procedure as the initial assessment except that non-conformities shall be resolved within 6 months. The IECRE Executive Secretary shall notify RECTF early in the year as to when their re-assessment is required for that year. The RECTF shall then apply for re-assessment within one month of the notification. In case of unsuccessful re-assessment or refusal, the RECTF will be suspended.

8.4.11 Withdrawal Requested by RECTF

An RECTF wishing to withdraw from the IECRE System shall notify the IECRE Executive Secretary via the national Member Body of the IECRE System at least one year in advance and shall indicate the reason for withdrawal and the date from which the withdrawal will become effective.
8.4.12 Suspension and Withdrawal

A RECTF may be suspended for non-payment of fees or for violation of any rules or violation of the spirit and intent of the IECRE System’s objectives and goals related to the facilitation of international trade and reciprocity of such. Any proposal to suspend an RECTF, or to cancel such suspension, shall require agreement by a majority of at least two-thirds of the total number of eligible votes received from the IECRE System Member Bodies, with abstentions and non-votes not being counted, except in the case of suspension for non-payment of fees as decided by the REMC, in which case the IECRE Executive Secretary may take the administrative action of suspension.

If the suspension of the RECTF has not been cancelled during the year after which the decision was taken, the RECTF concerned ceases to participate in the IECRE System (i.e. issue IECRE deliverables) and is fully withdrawn.

Suspended RECTF shall not be permitted to participate in the IECRE System during the period of suspension and shall have no right to issue IECRE System deliverables or receive documents and publications of the IECRE System.

RECTF whose suspension has been cancelled and have been reinstated must submit a new application, including any application fees, as well as outstanding fees, and must undergo a full initial assessment. However, an RECTF suspended only for the failure to pay fees can be reinstated upon fee payment without a new application. An RECTF who is withdrawn must reapply as a new RECTF applicant.
Annex A – SWG Terms of Reference

Scope

1. Each Sector Working Group (SWG) shall prepare and operate international Conformity Assessment Schemes within its specified sector based on the applicable IECRE Rules and with REMC approval.
2. In operating the Schemes within their sector(s), each SWG shall involve affected stakeholders.
3. The SWG shall support the future development of its sector to provide value to stakeholders.
4. In reporting to the REMC, the duties of each SWG are to:

A.1 Schemes, Rules, Procedures and Standards

A.1.1 Identify appropriate schemes required for its sector and make recommendations for approval by REMC.
A.1.2 Develop Operational Documents specific to its sector for REMC approval.
A.1.3 Define the scope, requirements and applicable standards to be used for each scheme approved by the REMC for its sector.

A.2 Alignment

A.2.1 Ensure a consistent application and common understanding of interpretations of international standards, conformity assessment processes and test method procedures within its sector.
A.2.2 Ensure alignment between the Operational Documents specific to its sector with those of the IECRE.
A.2.3 Ensure a common approach to the application of IECRE Scheme Rules and Operational Documents where applicable within its sector.

A.3 Applications Regarding Conformity Assessment

A.3.1 Prepare a proposals regarding applications and continued operation of conformity assessment bodies (e.g., Certification Bodies, Testing Laboratories, Customer Test Facilities), within each SWG’s sector, for approval by REMC.

A.4 Conformity Assessment

A.4.1 Ensure mutual recognition among RECBs, RETLs, RECTFs and REIBs and manage national differences within its sector.
A.4.2 Provide oversight and coordination of requirements to ensure a transparent and independent certification process for the sector.
A.4.3 Provide coordination of requirements for component certification within its sector and under other IEC systems (i.e., IECEE if appropriate).
A.4.4 Review and harmonize requests for interpretation of existing standards and the conformity assessment process used within its sector;
A.4.5 Publish results of interpretations and conclusions regarding conformity assessment and test procedures.
A.5 Stakeholder Engagement

A.5.1 Identify and encourage a balanced representation of stakeholders on the SWG reflecting its sector as required by the IECRE System.

A.5.2 Respond and discuss identified issues within its sector to stakeholders to ensure relevance and appropriate schemes to address stakeholder identified needs.

A.5.3 Respond to and provide a common understanding regarding identified concerns (i.e., risk) raised by affected stakeholders regarding the sector or the operation of the scheme within its sector.

A.6 Relationship with TCs/SCs

A.6.1 Establish liaisons with relevant TCs/SCs to increase collaboration, provide guidance, and monitor standards development within each SWG’s sector.

A.6.2 Identify changes to technical requirements necessary to operate the IECRE Schemes within each SWG’s sector and communicate these needs to the appropriate Technical Committees.

A.7 Promotion of Schemes

A.7.1 Support mutual recognition among member countries.

A.7.2 Support the promotion of the IECRE Schemes in its sector in conjunction with the REMC.

A.8 SGs & TFs.

A.8.1 Propose appropriate SWG Stakeholder Groups or Task Forces for its sector to the REMC.
Annex B– Approval and assessment process for RECTF

### RECTF approval process

**Candidate RECTF**
- Application for RECTF
  - Including a list of relevant ODs
  - Desired RECTF stage
  - Partnered RETL / REC B

**Assessor Team**
- Application through National Member Body
- Application From AD-001
- Rules are fulfilled and application accepted
- Assessment team including lead assessor appointed
- ODs with requirements for assessment team OD-??
- Competence area OD (general document)
- RECTF specific OD (RECTF – RETL interface)
- Assessment
- Basic information IECRE 02 - 8.4.5
- Draft assessment Report based on OD-005
- Summary assessment report
- Assessment
- Draft report to be discussed and non-conformities reported
- Final assessment report
- Scoping of assessment

**IECRE Executive Secretary**
- Yes
- NO
- Information

**OMC**
- Yes
- NO
- Information

**REMC**
- Acceptance of recommendation

**Customer Test Facility (CTF)**
- Acceptance of Assessor Team
- YES
- NO
- Information

**Application for RECTF**
- Application through National Member Body
- Application From AD-001
- Rules are fulfilled and application accepted
- Assessment team including lead assessor appointed
- ODs with requirements for assessment team OD-??
- Competence area OD (general document)
- RECTF specific OD (RECTF – RETL interface)
- Assessment
- Basic information IECRE 02 - 8.4.5
- Draft assessment Report based on OD-005
- Summary assessment report
- Assessment
- Draft report to be discussed and non-conformities reported
- Final assessment report
- Scoping of assessment

**Approved RECTF**
- YES
- NO
- Allowance to issue RE Test Reports (RETRs)

**Approved RECTF**
- YES
